

## Image Processing Services

### Our Specialized Graphic Designing services include:

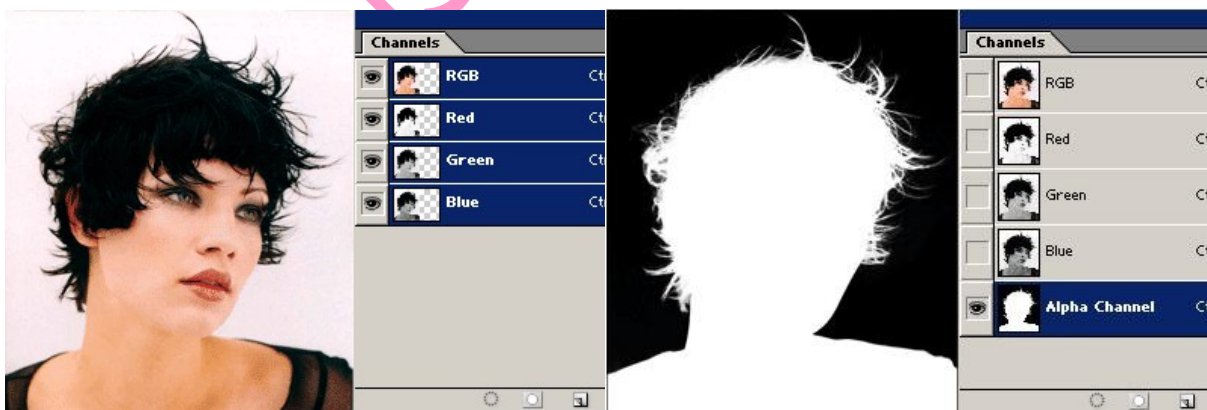

#### Tracing

Your product will be traced out of the original image and placed on a white back ground. We can also remove holding devices such as clips, jeweler's wax that held your model in place during the photo shoot. The final image is provided in JPEG format (other formats are also available).

#### Masking

An amazingly simple technique for removing the background from an image by creating a mask from an existing color channel. A channel mask is a special grayscale layer only 8 bits deep and is used to store and edit selections, contrast, sharpness, and color levels. We also remove scratches and replace missing or damaged areas.

## Cartoon Coloring

Our digital coloring will bring a realistic coloring to your line drawing. This approach will convert your black and white drawing into a beautiful "new" color file.

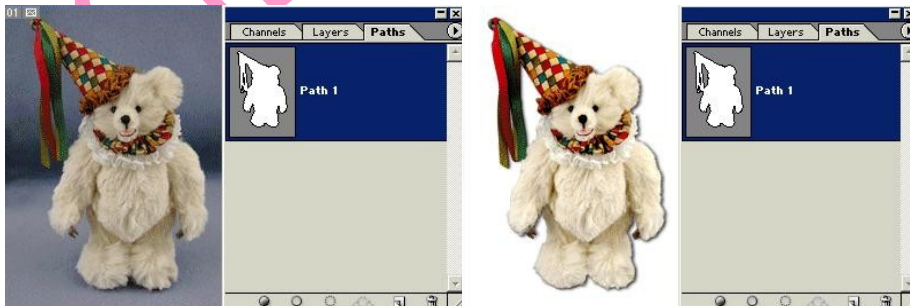

## Background Change

You may want this service if you have not a desirable view in your location. Outdoors, flowers, all longitudes and seasons are available.

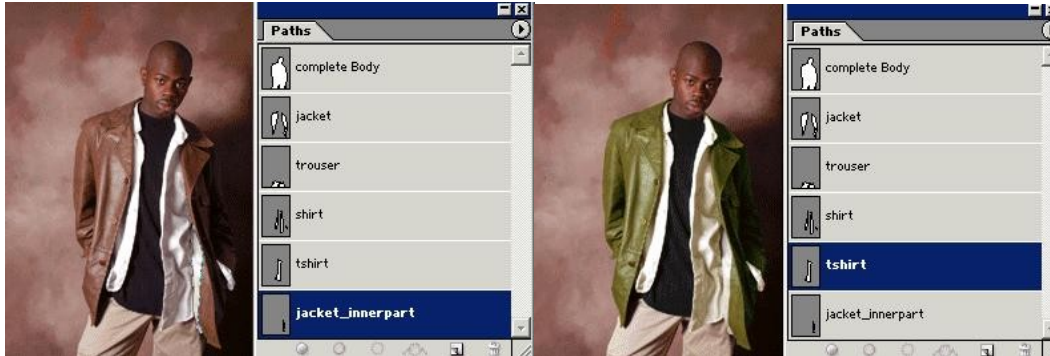

## Shadow and Enhancement

Not all digital cameras are created equal, even if you have your product shot on regular film, the colors of the picture depend on a variety of various factors for instance what temperature lights you were using. But if you got the composition right, got the product detail, there is nothing that should prevent you from using that using that image—take advantage of our digital image enhancement services.

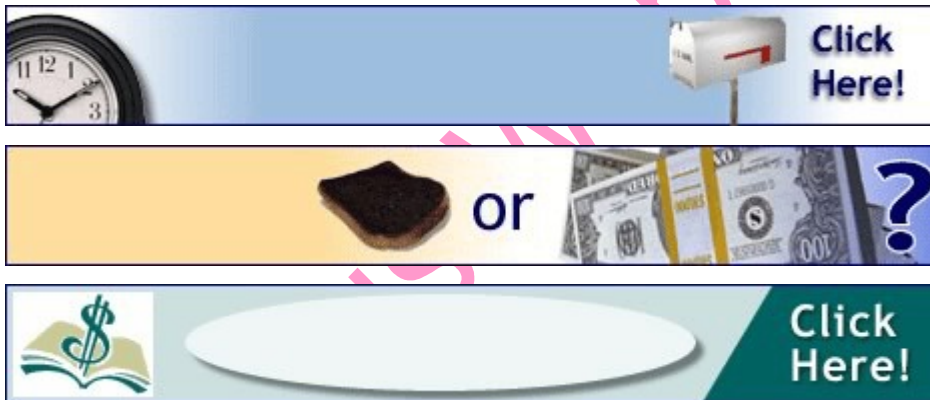

## Color Selection

Use our "color selection" procedure when you want to professionally change the color balance of your image in RGB or CMYK modus.

## Banner

We like to work with our clients and will offer a 'package price' for orders consisting of more than one banner design or a 468x60 animated gif and flash banner combination, banner ads for your affiliate program, etc...

## Removing things

You may want this service if you have not a desirable view in your location. Outdoors, flowers, all longitudes and seasons are available.

## Cleansing

Through the use of modern digital methods, it is now possible to repair old photographs without damaging the original.
